# Ouh, c'est compliqué! (ou pas)

**Welcome to Tails**

**Administration password**                                    Documentation

Enter an administration password in case you need to perform administration tasks.
Otherwise it will be disabled for better security.

Password:

**Windows camouflage**                                          Documentation

This option makes Tails look more like Microsoft Windows 8. This may be useful in public places in
order to avoid attracting suspicion.

Activate Microsoft Windows 8 Camouflage

**MAC address spoofing**                                        Documentation

Spoofing MAC addresses hides the serial number of your network cards to the local networks. This can
help you hide your geographical location.

It is generally safer to spoof MAC addresses, but it might also raise suspicion or cause network
connection problems.

Spoof all MAC addresses

**Network configuration**                                       Documentation

This computer's Internet connection is clear of obstacles. You would like to connect directly to the
Tor network.

This computer's Internet connection is censored, filtered, or proxied. You need to configure bridge,
firewall, or proxy settings.
